

## CURRICULUM VITAE

### A. BIOGRAPHICAL INFORMATION

#### 1. PERSONAL

**Name:** Dvira Segal  
**University Address:** Department of Chemistry, University of Toronto,  
80 St. George Street, Toronto, Ontario, M5S 3H6  
**Office Phone:** 416 946 0559  
**Email address:** dvira.segal@utoronto.ca

#### 2. DEGREES

**2004** Ph.D. (direct program) in Chemistry, Tel Aviv University  
**Title of Graduate thesis:** Electron transfer in molecular conductors  
**Supervisor:** Professor Abraham Nitzan

**1998** B.Sc. in Chemistry Major-Computer Science Minor,  
CUM LAUDE, Tel Aviv University

#### 3. EMPLOYMENT

**July 2017-** Professor, Department of Chemistry, University of Toronto  
**July 2012-2017** Associate Professor, Department of Chemistry, University of Toronto  
**July 2007-2012** Assistant Professor, Department of Chemistry, University of Toronto  
**2006-2007** Postdoctoral Fellow  
Department of Chemistry, Columbia University, New York  
**2003-2005** Concurrent Postdoc position in:  
Chemical Physics Department, Weizmann Institute of Science, Rehovot, Israel  
Department of Chemistry University of British Columbia, Vancouver, Canada

#### 4. HONOURS

**2014-2023** Canada Research Chair (Tier II) in Theoretical Chemistry  
**2010-2012** Alfred P. Sloan Research Fellow  
**2010-2015** Early Research Award  
**2000-2003** The Clore scholarship for Ph.D. students  
**1995, 1996** The Dean's list for academic achievements in the  
Faculty of Exact Sciences, Tel-Aviv University

#### 5. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Chemical Institute of Canada (CIC): Member  
Quantum Transport and Thermodynamics Society (QTTS)

## B. ACADEMIC HISTORY

### 6A. RESEARCH ENDEAVOURS

#### Field: Theoretical Chemical Physics

(a) **Quantum transport and dissipation.** Our research is focused on the development of analytical and computational methods for describing charge and energy transport processes in condensed phases. This includes: (i) Formulation of methodologies for following the dynamics of many-body quantum systems driven out-of-equilibrium by a potential bias or/and a temperature gradient. (ii) Analysis of simple model systems for elucidating basic transport mechanisms, including single-molecule conduction, molecular thermoelectrics.

(b) **Energy transfer at the nanoscale.** We aim to understand the relationship between a microscopic description of a system and its energy transport characteristics—in the quantum regime—going beyond particular realizations. This includes the study of phononic, excitonic, and photonic energy flow in low dimensional systems. We are interested in elucidating nonlinear energy transport effects such as thermal rectification and in modeling molecular heat engines. This work connects with the fields of “quantum thermodynamics” and “nanophononics”.

(c) **Quantum statistical mechanics.** We are interested in validating the heat exchange fluctuation theorem, quantifying violations of the second law, in strongly-coupled many-body quantum systems. By acquiring the cumulant generating function of nontrivial models we calculate the corresponding (quantum) heat current and its moments.

(d) **Finite time thermodynamics.** We are exploring fundamental issues in classical and quantum thermodynamics such as the universality of the maximum-power efficiency, Landauer’s erasure principle, and information theory exorcism of Maxwell’s demon.

## C. SCHOLARLY AND PROFESSIONAL WORK

Names of students trained by D. Segal are underlined.

### 7. REFEREED PUBLICATIONS

## 8. NON-REFEREED PUBLICATIONS

### A. Articles

1. Inelastic effects in molecular conductors, D. Segal and A. Nitzan, *Single Molecule* **3**, 321 (2002).
2. P. Král, D. Segal, M. Shapiro, I. Thanopoulos, B. E. Granger, and H. R. Sadeghpour, Bands of image states in nanowire lattices and infrared-control of proteins on nanotube ropes, *Fullerenes, nanotubes, and carbon nanostructures* **13**, 267-274 (2005).
3. A tribute to Paul Brumer in the Canadian Journal of Chemistry, D. Segal (Guest Editor), *Can. J. Chem.* **92**(2) (2014).
4. D. Segal, Probing the limits of heat flow, *Science* **355**, 1125-1126 (2017) (perspective).

### B. Books Chapters

5. Tubular Image States and Trapping on the nanoscale, D. Segal, P. Král, and M. Shapiro, in "Coherent Control of Molecules" (2006), Collaborative Computational Project on Molecular Quantum Dynamics (CCP6), Daresbury, pp. 77-85, B. Lasorne and G.A. Worth, editors.
6. Theory, Experiment and Applications of Tubular Image States, D. Segal, P. Král, and M. Shapiro, "*The Oxford Handbook of Nanoscience and Technology: Frontiers and Advances*" A. V. Narlikar and Y. Y. Fu, editors. (Oxford University Press, Oxford, 2008)- Vol I, chap. 22, 823-864.
7. Heat transfer in nanostructures, D. Segal, "Proteins: Energy, heat and signal flow", (2009), D. Leitner and J. Straub, editors. CRC Press.

## 9. MANUSCRIPTS SUBMITTED

1. N. Anto Sztrikacs and D. Segal, Strong coupling effects in quantum thermal transport with the reaction coordinate method, arXiv:2103.05670. Under review in *New. J. Phys.*
2. S. Saryal, M. Gerry, I. Khait, D. Segal, and B. K. Agarwalla, Universal Bounds on Fluctuations in Continuous Thermal Machines, arXiv:2103.13513. Under review in *Phys. Rev. Lett.*
3. J. Liu and D. Segal, Boosting quantum battery performance by structure engineering, arXiv:2104.06522. Under Review, *Phys. Rev. Lett.*

## 10. PRESENTATIONS at MEETINGS and SYMPOSIA (Invited) (2008-onward)

Over the past 5 years I had received invitations to present my work (invited speaker) in  $\sim 6 - 8$  focused conferences, per year. I had accepted invitations and presented my work in the following meetings:

- National University of Singapore, Singapore, “Transmission of Information and Energy in Nonlinear and Complex Systems (TIENCS)” (May 2008).

- Helsinki University of Technology, Finland, Conference on “Micro and Nanocryogenics” (Aug. 2008).
- The 92nd Canadian Chemistry Conference and Exhibition, Hamilton, Ontario, Canada “Quantum Chemical Dynamics Symposium” (June 2009).
- Telluride, Colorado, Workshop on “Quantum Transport in Nanoscale Molecular System” (July 2009).
- UCSD, La Jolla, California, A meeting on “Optimization at a small scale” (July 2009).
- Stuttgart, Germany, International symposium “Quantum Thermodynamics: Energy and Information Flow at the Nano-Scale” (Sep. 2010).
- Erice, Sicily, Italy, “New trends in nonlinear dynamics: Heat control and thermo-electric efficiency” HEAT2010 (Oct. 2010).
- Snogeholm, Sweden, “Thermodynamics: Can macro learn from nano?” (May 2011).
- Telluride, Colorado, Workshop on “Chemistry and Dynamics in Complex Environments” (June 2011).
- Telluride, Colorado, Workshop on “Quantum Transport in Nanoscale Molecular Systems” (Aug. 2011).
- Hebrew University, Israel Institute for Advanced Studies, Jerusalem, Workshop on Molecular Electronics (July 2012).
- Telluride, Colorado, Workshop on “Quantum Transport in Nanoscale Molecular Systems” (July 2013).
- University of Toronto, CQIQC-Fields Institute CQIQC-V Conference on Quantum Information and Quantum Control (Aug. 2013).
- Bremen, Germany, CECAM workshop on nanophononics (Aug. 2013).
- Tel Aviv University, CECAM workshop on “Quantum Dynamics in Molecular and Nano-Materials: Mechanisms and Functionality” (Nov. 2013).
- Telluride, Colorado, Workshop on Condensed Phase Dynamics (June 2014).
- University of British Columbia, Conference on “Coherence and Control in the Quantum World: the Legacy of Moshe Shapiro” (Aug. 2014).
- Weizmann Institute of Science, Conference on “Coherence and Control in the Quantum World: Current and Future Trends” (Dec. 2014).
- Telluride, Colorado, Workshop on “Quantum effects in condensed-phase systems” (July 2015).
- University of Hong Kong, CECAM workshop: “Open Quantum Systems: Computational Methods” (Nov. 30 to Dec. 4 2015).
- San Sebastian, Spain, “Towards Reality in Modelling of Molecular Electronics” (June 2016).
- Telluride , Colorado, Workshop on “Condensed Phase Dynamics”, (June 2016).
- Paris, France, CECAM meeting on “Seeking synergy between dynamics and statistics for non-equilibrium quantum processes”, (June 2017).
- ITAMP, Harvard University, Cambridge MA, Workshop on Quantum Thermodynamics (Oct. 2017).
- Waterloo, Canada, Symposium on Chemical Physics (Nov. 2017).
- ACS March meeting, Symposium on “The Chemistry of Molecular Electronics” (March 2018).
- The 101 Canadian Chemistry Conference and Exhibition (CSC101), symposium on ‘Assessing complex free energy surfaces from molecular simulations: From electronic structure to mesoscopic processes’, Edmonton (May 2018).
- Telluride , Colorado, Workshop on “Condensed Phase Dynamics” (July 2018).
- School and Workshop on Quantum and Nano Thermodynamics, University of Uppsala, Sweden (Sep. 2018).
- CSC 2019, Quebec City: Symposium on ‘Recent Developments in Quantum Molecular Dynamics Algorithms and Applications’ (June 2019)
- Banff International Research Station Workshop on Charge and Energy Transfer Processes: Open Problems in Open Quantum Systems Aug. 2019 (co-organizer)
- QTD2020 – Conference on Quantum Thermodynamics, Barcelona, Spain (Virtual, Oct. 2020).

## 11A. INVITED LECTURES

- University of Toronto, Condensed Matter Physics Seminar Series (November 2009).
- Tel Aviv University, Israel, Chemical Physics Seminar Program (December 2009).
- University of Pennsylvania, Physical Chemistry Seminar (November 2011).
- Department of Chemistry, University of Toronto, John Valleau Special Lecture, (November 2011).
- Department of Physics and Astronomy, Uppsala, Sweden, Seminar (May 2012).
- School of Chemistry, Tel Aviv University, Physical Chemistry Seminar (Dec. 2012).
- Department of Chemistry, Weizmann Institute of Science, Physical Chemistry Seminar (Dec. 2013).
- Department of Chemistry, UCSD, Physical Chemistry Seminar (Feb. 2014).
- Department of Chemistry, University of Pittsburgh (April 2015).
- Department of Chemistry, Tulane University, New Orleans (September 2015).
- Department of Physics, Bar-Ilan University, Israel (December 2015).
- Colloquium, Department of Physics and Astronomy, McMaster University (Nov. 2016).
- Colloquium, Department of Physics, Technical University Berlin (Dec. 2016).
- Quarantine Thermodynamics virtual seminar series, Trinity College Dublin (May 2020).
- Department of Chemistry, UC Berkeley, Pitzer Center for Theoretical Chemistry (Virtual seminar, June 2020).
- Department of Applied Physics, University of Geneva (Virtual seminar, Nov. 2020).
- Greater Boston Area Theoretical Chemistry Lecture Series (Virtual, April 2021).

#### **11B. INVITED LECTURES (May. 2021-)**

- Colloquium, Center for Nonlinear Studies Los Alamos National Laboratory (May 2021).
- Workshop on Quantum Transport, Telluride Science Research Center (July 2021)
- ACS Fall meeting, symposium on Synthesizing Quantum Coherence (Aug. 2021).
- KITP Program and conference on Application for Transport and Efficient Energy Conversion in Quantum Systems (Santa Barbara, Aug 2021).
- American Conference on Theoretical Chemistry, Squaw Valley, CA, (July 2022)
- PacificChem Hawaii, Quantum coherence in energy transfer symposium (Dec. 2021)
- PacificChem Hawaii, Molecular Electronics: The synergy of synthesis, measurement and theory (Dec. 2021).
- WE-Heraeus-Seminar on Photon, Phonon, and Electron Transitions in Coupled Nanoscale Systems (Postponed from 2021 to 2022).

#### **D. LIST OF COURSES**

##### **12. A. UNDERGRADUATE COURSES**

CHM 427, Statistical Mechanics	2021
CHM 221/225/223S, Physical Chemistry: The Molecular Viewpoint	2012-2013, 2015-2020
PHY 472H, Supervised Readings II	2020
PHY 479Y, Undergraduate Research Project	2011-2012, 2017-2018
CHM 135/139S, Chemistry: Physical Principles	2008-2010, 2012, 2015-2019
CHM 326F, Introductory Quantum Mechanics	2012
CHM 423F, Applied Quantum Mechanics	2008-2010
CHM 499Y, Introduction to Research in Chemistry	2008-2010, 2019-2021
CHM 299Y, Research Opportunity	2008-2009

##### **B. GRADUATE COURSES**

CHM 1480S, Statistical Mechanics	2021
CHM 1443F, Intermediate Quantum Mechanics: Focus on open systems	2014, 2016, 2018
CHM 1490Y, Physical Chemistry Seminar	2012-2013
CHM 1478, Quantum Mechanics for Physical Chemists	2009, 2011

### C. THESIS SUPERVISION: MSc and Ph.D. STUDENTS

Matthew Gerry	Thermodynamics uncertainty relation in quantum systems	2020-
Na'im Kalantar	Thermal rectification in classical chains	2020-
Francisco Lai-Liang	Spin filtering in chiral biomolecules	2020-
Nicholas Anto-Sztrikac	Reaction Coordinate method in quantum transport	2019-
Hava Friedman	Quantum transport and quantum thermodynamics	2015-2020
Roya Moghaddasi Fereidani	Energy transport in molecules	2016-2018
Michael Kilgour	Molecular conduction: From principles to functionality	2014-2019
Salil Bedekhal	Quantum transport in Aharonov-Bohm interferometers	2010-2014
Yelena Simine (nee Nicolin)	Theory of charge transport through vibrating molecules	2009-2014
Claire Xue Yu	Energy transfer at the molecular scale: open quantum systems methodologies	2008-2013

### RESEARCH SUPERVISION: POSTDOCTORAL FELLOWS/RESEARCH ASSOCIATES

Ilia Khait	Machine learning techniques in quantum thermodynamics	2020-
Junjie Liu	Mixed quantum-classical simulations	2019-
Abhay Shastray	Flicker noise in atomic scale junctions	2018-2019
Bijay K. Agarwalla	Thermoelectricity of nanojunctions	2015-2017
Edward Taylor	Quantum bounds for quantum transport	2014-2015
Manas Kulkarni	Equilibration in closed quantum systems	2012
Savannah S. Garmon	Exceptional points in open quantum systems	2009-2012
Malay Bandyopadhyay	DNA bubble dynamics and energy transfer in nanoscale junctions.	2009-2012
Yun Zhou	Heat engines and information theory	2008-2010
Lianao Wu	Quantum energy transfer at the nanoscale: fundamentals and applications	2008-2009

### UNDERGRADUATE RESEARCH SUPERVISION

Felix Ivander	Quantum transport at the nanoscale	CQIQC Summer Fellow 2021
Jiaming Wang	Thermal conduction in molecules	NSERC USRA 2019
Na'im Kalantar	Classical transport	NSERC USRA 2018, CQIQC 2019
Robert Adam Lang	Quantum absorption refrigerators	Summer 2018
Anqi Mu	Quantum thermodynamics	CQIQC Summer Fellow 2017
Roman Korol	Molecular thermopower	CQIQC Summer Fellow 2017
Hyehwang Kim	Tunneling-hopping conduction in DNA	Excellence Research Award 2016-2018
Nazim Boudjada	Spin dynamics and heat transport	Chemistry Research Scholarship 2016
Amro Dodin	Landau Zener transitions in open systems	CQIQC Summer Fellow 2014
Wei Jia Chen	Thermoelectricity of molecular junctions	NSERC USRA 2013
Kunal Tiwari	Equilibration in interacting quantum systems	NSERC USRA 2013
Pengcheng Dong	Heat capacity of nonlinear chains	PHY 479Y 2011-2012
Yelena Nicolin	Dimers diffusion on temperature gradients	CHM 499Y 2009-2010
Guillermo Toro Silvero	The damped-anharmonic oscillator	CHM 499Y 2008-2009
		CHM 299Y 2008-2009

### D. OTHER TEACHING and OUTREACH ACTIVITIES

Second annual “Ask a Laureate event”; Poster, Judge Science Rendezvous, Pueblo Science	2011, 2013 2012-2014
---	-------------------------

## **E. ADMINISTRATIVE POSITIONS**

### **13. A. UNIVERSITY SERVICE**

Department of Chemistry:	Information Technology and Cyber security committee, chair. (2015-2018) Search Committees (2019, 2020) Building Oversight Committee (2020-) Departmental Advisory Committee (2020-) Promotions Committee (2020-) Undergraduate Studies Committee (2010-2013, 2018-2019) Progress Through the Ranks Research Committee (2015, 2018) Colloquium Committee (2007-2010, 2019-2020) Graduate Student Committee (2007-2010)
Outside the Chemistry Department:	Interim Director (April 2021 - ), Centre for Quantum Information and Quantum Control (CQIQC) Dean's representative in Search Committees (2018-2019) Dean's Working Group on Cyber Risk Mitigation (2015-2017) Scinet Local Resource Allocation Committee (2010-2011)
PhD Committees:	Ongoing: ~15 students from the Departments of Chemistry and Physics

### **13. B. OUTSIDE THE UNIVERSITY SERVICE**

Journal Referee (~ 20 in 2020)	APS, ACS, RSC, AIP, Elsevier and IOP Journals, AAAS including: Phys. Rev., JCP, JPC, JACS, Science, Nature, PNAS, Nano Lett., PCCP, Chemical Science, EPL, ACS Nano, Small, NJP.
Ontario Graduate Scholarships: Guest Editor	Member of adjudication panel (2012) Journal of Physical Chemistry A Abraham Nitzan Festchrift 2019 (with M. Galperin, J. Subotnik)
Conference Organization:	(i) Condensed Phases Dynamics (Telluride 2020, turned virtual) (ii) Banff International Research Station BIRS (2019), Co-organizer of the workshop “Charge and Energy Transfer Processes: Open Problems in Open Quantum Systems”. (iii) Penn Conference in Theoretical Chemistry (PCTC) (2019) (iv) 100th Canadian Chemistry Conference and Exhibition (2017), Co-chair, PT division program (12 symposia) Co-organizer, Symposium on “Quantum Dynamics in Chemistry” (v) Theoretical Chemical Physics Symposium, 93rd Canadian Chemistry Conference and Exhibition (2010)
External Thesis Examiner	Physics, University of Bordeaux (2020) Physics, University of Konstanz (2019) Chemistry, University of British Columbia (2018) Physics, National University Singapore (2015) Physics, Raman Research Institute Bangalore (2009)
Grant and Fellowship Review (2007-2020)	NSF, DOE-BES, RCSA, BSF, Alfred P. Sloan Foundation, NSERC Discovery Grant, GIF, NWO, DFG, ISF, Research Corporation (Cortell) US Air Force (AFOSR), BSF, ISF, Ikerbasque foundation.
