

## **Thirty Sixth Annual Chemistry Club Banquet 1955**

From its beginning in 1919 up to the early 1970s, the Chemistry Club was extremely active, and from the 1950s? to the late 1960s organized annual banquets at which the faculty were “roasted” in hilarious and often pitilessly insightful skits. These annual banquets continued until the late 1960s, after which the Chemistry Club became somewhat dormant during the student unrest of the 1970s. Thankfully, the current Chemistry Club has recovered and expanded its vigour and scope and, since the 1980s, has again become a vital force in the Department. However, with the changed nature of both the Department and University since the early 1970s, the Annual Chemistry Club Banquet get-togethers of students and faculty are regrettably no more.
